

## SAM COVID Safety Checklist and Guidelines

In order to keep the SAM community safe, we ask that you fully review and follow the COVID checklist and safety guidelines before attending in-person workshops and classes.

### COVID SAFETY CHECKLIST:

If you think you may be sick, or are experiencing COVID like symptoms (fever, cough, body ache, and other symptoms), please do not visit the museum or attend classes.

- If you are feeling unwell, take your temperature at home before coming to the museum.

### COVID GUIDELINES:

- Masks are not required to be worn by museum visitors, volunteers, and staff while on museum premises, though they are suggested for those who are unvaccinated or at a higher risk of getting very sick with COVID.
- The museum fully supports those who choose to wear a mask, and masks are available upon request.
- When possible, try to maintain 6 feet from others as suggested by the CDC.
- Cover your face when sneezing and coughing.
- Wash and sanitize your hands thoroughly and frequently. Hand Sanitizer is available throughout the museum.
